Microjet Wound Therapy

Optimizes wound bed preparation
to advance healing

- Allows for precision and control to remove non-viable tissue leaving healthy tissue intact²
- Reduces the incidence of infection and hospitalizations¹ resulting in lower total cost of care
- Minimizes reliance on general anesthesia^{2,3}

Welcome to the world of
Dynamic Wound Therapy

medaxis

Precision and control for all wounds types

-  Standard and flat jet hand pieces
-  1-5 Range of intensity levels
-  Intuitive control using distance and angle

Significantly more wounds healed with less complications

Microjet Wound Therapy is clinically superior² to sharp debridement when treating hard-to-heal wounds
